Re: Planning for school-based H1N1 vaccine clinics

Planning for school-based H1N1 vaccine clinics for Door County has started. Schools were chosen randomly for the scheduling order for these clinics.

The order for the clinics is the following:

1. Sevastopol—Tentative date: November 6, 2009
2. Gibraltar—Tentative Date: November 13, 2009
3. Southern Door—To be determined
4. St. Peters Lutheran—To be determined
5. Sturgeon Bay—To be determined
6. Zion Lutheran—To be determined
7. St. John Bosco—To be determined
8. Washington Island—To be determined

Vaccine availability will determine the final dates for the clinics.

Parent/guardians will receive a letter, a consent form, and vaccine information forms prior to the clinics from the school. Signed consent forms will need to be sent back to the school in order for the child to receive the vaccine. These forms will also be posted on the Door County website www.co.door.wi.gov under the Public Health Department area.

There are two types of H1N1 vaccines—the nasal mist and the injection/shot. Our department hopes to have the nasal mist in sufficient supply to use nasal mist for the school-based clinics. This will depend on supply.

Vaccine is shipped to our department weekly and we do not know what we will receive until it arrives. This makes planning difficult, but we will continue to plan with the information that we have available.

If plans need to change, based on vaccine availability, we will notify parents/guardians and will post the information on the Door County website at www.co.door.wi.gov.

Thank you for your patience.
